- **Decades of Proven Expertise**

Backed by 30 years of industry experience across Syria, Sagherji Integrated Technologies is recognized as a reliable partner for residential, commercial, and industrial projects. The company stands out for its engineering excellence, meticulous attention to detail, uncompromising quality, and on time project delivery.

- **Comprehensive Service Portfolio**

The company provides a diverse range of cutting edge solutions, including security systems, telecom and networking, access control, automation, advanced lighting, and solar energy. These integrated technologies are expertly designed to elevate security, optimize efficiency, and translate ambitious design concepts into highly functional, real world applications.

- **Commitment to Smart, Sustainable Innovation**

Uniting superior quality with intelligent design, Sagherji focuses on state of the art, eco-friendly, and fully automated concepts. This visionary approach successfully transforms standard environments into secure, flexible, sustainable, and highly efficient modern spaces.

OUR VISION & COMMUNITY

- **Professional Dedication to Excellence**

The company believes that successfully bringing an idea to life requires unwavering commitment and a highly professional touch. By leveraging the latest advancements in technology, engineering, and design, Sagherji guarantees superior outcomes and exceptional results for every project they undertake.

- **Value-Driven Integrated Solutions**

Sagherji is dedicated to delivering maximum value across its extensive suite of services, which include security, networking, automation, lighting, and solar energy. To achieve reliable, high performance implementations, the company capitalizes on its highly qualified workforce, deep market knowledge, robust distribution network, and strategic global partnerships.

- **Sustainable and Client-Centric Innovation**

Operating with a philosophy that extends beyond standard commercial solutions, Sagherji prioritizes sustainability throughout the entire system lifecycle. By integrating energy-efficient equipment and eco-friendly standards from concept to maintenance, the company reduces environmental impact while ensuring superior operational efficiency, resilience, and future proof performance.

UP TO FIVE YEARS WARRANTY

Sagherji Integrated Technologies proudly offers an extensive range of high performance products backed by up to a 5 year warranty covering operational efficiency and system reliability.

We partner with leading global manufacturers to procure top-tier components, hardware, and control systems, ensuring the seamless delivery of advanced technological solutions across all our domains including Security Systems, Telecom & Networking Solutions, Access Control & Time Attendance, Automation & Control Systems, Advanced Lighting Solutions, and Solar Energy Solutions.

All our products are distinguished by their exceptional build quality, extended operational lifespan, optimized energy efficiency, and minimal maintenance requirements, coupled with our ability to tailor custom engineering solutions to meet the specific requirements of our clients.

OUR SERVICES

Securing Today
Powering Tomorrow

- **Unified Security Platform**

Sagherji provides a comprehensive, all-in-one protection solution that seamlessly integrates wireless intrusion alarms, motion sensors, and high resolution CCTV. This unified approach ensures instant communication with monitoring stations and delivers robust, 24/7 surveillance across a single centralized platform.

- **Advanced Analytics and High Resolution Surveillance**

Utilizing cutting edge 4K/8MP cameras equipped with HDR and night vision, the systems feature smart AI analytics capable of distinguishing between people, vehicles, and animals. This intelligent motion detection significantly reduces false alarms while enabling precise footage searches and real time line crossing alerts.

- **Scalable Deployments with Remote Accessibility**

Designed to accommodate any scale from small retail spaces to expansive industrial facilities the systems utilize streamlined Power over Ethernet (PoE) installations and flexible 30-day NVR or cloud storage options. Clients can securely monitor live feeds and alerts from anywhere in the world via a fully encrypted mobile application.

- **Full Spectrum Network Architecture**

The company designs and engineers comprehensive, end-to-end network ecosystems, encompassing structured fiber and copper cabling, routing, switching, and enterprise firewalls. These robust foundations are built utilizing industry-leading hardware from brands like MikroTik, Ubiquiti, and Grandstream to ensure maximum resilience and security.

- **Mission Critical Voice Communications**

Sagherji delivers enterprise grade IP telephony, VoIP, and SIP trunking tailored for businesses of any size. Whether deploying a system for a single office or establishing a carrier-grade voice platform for a sprawling corporate campus, these solutions guarantee reliable, crystal-clear communications.

- **High-Capacity Wireless Backhaul & Turnkey Delivery**

Bridging vast distances without the need for costly fiber trenching, the company deploys long range lightbeam dishes and wide-area mesh wireless networks to seamlessly connect multi-building sites. Every deployment is backed by complete lifecycle management from initial site surveys and link budget calculations to final commissioning and ongoing support.

GUESTROOM MANAGEMENT SYSTEMS (GRMS)

GRMS seamlessly blends access control with hospitality. By integrating directly with your Property Management System (PMS), guest credentials are automatically issued at check-in and voided at checkout. This eliminates front-desk delays and ensures guests never face a dead key at their door.

Inside the room, guests manage lighting scenes, climate, and curtains from a single, intuitive panel. To maximize efficiency, climate control automatically scales back when rooms empty or balcony doors open. Engineered on open protocols (BACnet, KNX, and Modbus), our GRMS integrates fully with your building management system and updates housekeeping dashboards in real-time. It is ideal for hotels, serviced residences, and hospital wings.

- Mobile key & RFID access: Automatically managed at check-in and check-out.
- Two-way PMS integration: Compatible with Opera, Fidelio, and others.
- Unified in-room control: One panel for lighting scenes, climate, and curtains.
- Occupancy-based energy savings: HVAC and lighting scale back when the room is empty.
- Real-time status reporting: DND/MUR statuses sent directly to the housekeeping dashboard.

ACCESS CONTROL & TIME ATTENDANCE

- **Comprehensive Access & Authentication**

Designed to secure everything from single-door units to enterprise systems, these solutions provide total control over facility entry. The systems utilize a versatile mix of multi modal authentication including facial recognition, fingerprint, palm vein, RFID, and PIN. Administrators can manage custom access schedules, receive instant alerts for unauthorized attempts, and integrate the setup directly with existing CCTV and alarm systems for a unified security network.

- **Automated Workforce & Payroll Management**

Going beyond secure entry, the centralized software provides complete visibility into employee attendance and streamlines daily operations. Through an accessible web or mobile dashboard, the system automatically calculates salaries based on actual hours worked seamlessly factoring in overtime, late penalties, and shift differentials and integrates directly with your existing payroll and ERP platforms for effortless workforce administration.

- **Centralized Building Intelligence**

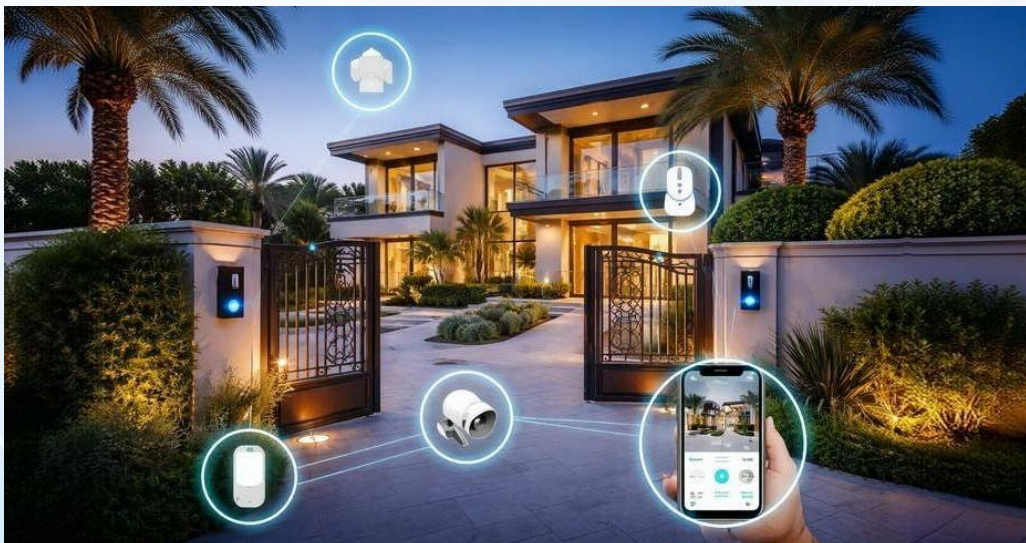

Our automation platforms bring every facility subsystem including lighting, HVAC, shading, and access control under a single, intuitive interface. Supporting robust open protocols like BACnet, KNX, and Modbus, the system provides unified command via centralized touch panels and mobile applications for effortless facility management.

- **Smart Energy & Occupancy Management**

Designed to maximize comfort while minimizing waste, the systems intelligently adapt to occupant behavior to automatically adjust environmental settings. Through occupancy-based HVAC and lighting scheduling, paired with real-time energy analytics and consumption tracking, facilities continuously operate at peak efficiency.

- **Seamless Scalability & Expert Commissioning**

Built on open standards to prevent vendor lock-in, these solutions effortlessly scale from single room automation to enterprise grade building management. Certified engineers manage the entire lifecycle from custom programming and commissioning to comprehensive end user training ensuring a smooth transition to a future ready, intelligent facility.

- **Intelligent Illumination & Dynamic Control**

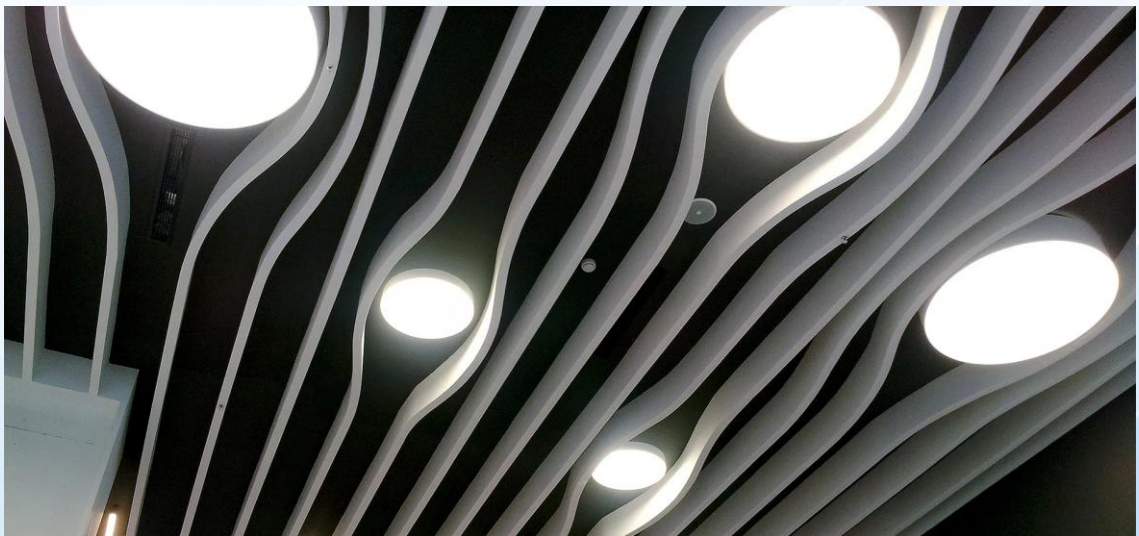

Transform any space with smart lighting systems that feature automated dimming, color tuning, and customized scene creation. Users are given complete flexibility to adjust their environments effortlessly using smartphone apps, centralized wall panels, or voice assistants, ensuring the perfect lighting for any moment.

- **High Efficiency Energy Management**

Designed to significantly reduce operational costs without compromising on comfort or ambiance, the high efficiency LED systems seamlessly integrate with motion and daylight sensors. By utilizing advanced DALI dimming and occupancy-based scheduling, these solutions can achieve up to 70% in energy savings.

- **Versatile Design & End-to-End Delivery**

Built on robust open standards like DALI, KNX, and Zigbee to ensure broad fixture compatibility, these scalable solutions are perfectly tailored for luxury villas, modern offices, or industrial properties. **Sagherji provides comprehensive, end-to-end service handling everything from initial lighting design and fixture selection to expert installation, programming, and ongoing support.**

SAGHERJI
INTEGRATED TECHNOLOGIES

SOLAR ENERGY SOLUTIONS

- **High Efficiency Solar & Smart Storage**

Designed to significantly reduce carbon footprints and cut electricity costs, these systems utilize premium grade monocrystalline photovoltaic panels and advanced inverters to deliver maximum yield in any weather. By pairing this high-efficiency solar technology with robust lithium-ion battery storage options, homes and businesses can achieve true 24/7 energy independence.

- **End-to-End Custom Engineering**

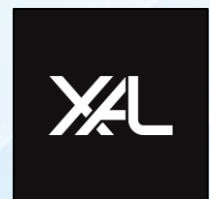

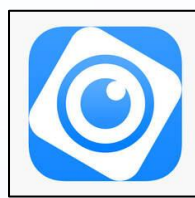

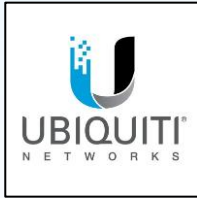

Partnering with world-leading manufacturers, Sagherji's certified installers optimize every system specifically for a property's unique roof layout and energy consumption patterns. The company provides complete lifecycle management for both residential villas and large-scale commercial rooftops handling everything from initial site assessments and system design to expert installation.

- **Long Term Reliability & Smart Monitoring**

Built to last, these solar installations are backed by an impressive 25-year performance warranty. Clients benefit from total transparency via a mobile app that allows for real-time monitoring of energy production and usage, while Sagherji's comprehensive after-sales support ensures optimal functionality through regular performance checks and rapid response maintenance.
